RECOMMENDED TAKEOVER OFFER BY LIONGOLD FOR SIGNATURE METALS

LionGold Corp Ltd (“LionGold” or “the Group”) (SGX:LIGO) (“LionGold”) and Signature Metals Limited (ASX:SBL) (“Signature”) are pleased to announce that they have signed a Bid Implementation Agreement (“BIA”) for an off-market takeover bid by LionGold for all the issued and outstanding shares in Signature (“Bid”).

The transaction is value enhancing for both LionGold and Signature shareholders. As a shareholder in LionGold following successful Bid completion, Signature shareholders will become shareholders in an emerging gold producer with a proven and experienced board and management team and access to a geographically diversified and growing asset base.

Consideration for the transaction will be in LionGold shares, with Signature shareholders offered one (1) LionGold share for every [34] Signature shares (“Offer”). The transaction values Signature at A\$0.02 per share, or approximately A\$54.091 million.

The Offer is **unanimously recommended** by the Signature board in the absence of a superior proposal. The Signature directors intend to accept the Offer for their shares in the absence of a superior proposal.

Transaction Details

The exchange ratio of one (1) LionGold share for every [34] Signature shares represents an attractive premium for Signature shareholders. The implied offer price of \$0.02 per share (based on a LionGold share price of [SGD\$0.8657 and foreign exchange rate of \$SGD1.2869: \$AUD1.00]) represents:

- **A 54% premium to the closing price of 1.3c per Signature Share on ASX on the last trading day (13 October 2011) before the Announcement Date.**
- **A 46% premium to the one month volume weighted average price of 1.37c per Signature Share on ASX on the last trading day (13 October 2011) before the Announcement Date.**

- **A 16% premium to the 90 day volume weighted average price of 1.73c per Signature Share on ASX on the last trading day (13 October 2011) before the Announcement Date.**

Signature directors **unanimously recommend** that in the absence of a superior proposal, all shareholders accept the Offer. Signature directors intend to accept the Offer in respect of any Signature shares they control, in the absence of a superior proposal.

Under the terms of the Implementation Deed, Signature will use its best endeavours to procure the execution by certain Signature Shareholders of Pre-Bid Agreements so that, in aggregate, Liongold has received undertakings from Signature Shareholders holding up to 19.9% of the Signature Shares. Further particulars of the terms of these agreements will be provided by LionGold in a substantial shareholder notice to be lodged with ASX.

The offer will not be subject to a minimum acceptance condition. A copy of the BIA, including the conditions to the bid, is attached as an Annexure.

The parties have agreed that Signature will not solicit any competing proposal or participate in any discussions or negotiations in relation to a competing proposal (subject to fiduciary duty carve outs). A break fee of \$300,000 is payable in certain circumstances.

Commenting on the transaction, Tan Sri DatoNik Ibrahim Kamil, Executive Chairman and Group CEO of LionGold Corp Ltd remarked *“LionGold believes there is strong development potential in this acquisition. Signature has focused their efforts on open pit mining and has established 1.47 million oz au of JORC compliant indicated and inferred resources. The LionGold technical team with strong expertise in both alluvial mining and underground mining has identified exciting opportunities for these that have not been the focus of the Signature team. The Signature offer is our biggest acquisition to date and rightly so. This is an ideal acquisition that adds tremendous value to shareholders.”*

Emphasizing his confidence in LionGold’s rapid growth strategy, Matthew Wood, Chairman of Signature Metals Limited said *“we are impressed with LionGold’s ambition to create a mid tier gold producer based out of Singapore and are very happy that Signature shareholders have been offered the opportunity to be part of this golden future.”*

Highlights

- **Signature’s 70% owned Konongo Gold project is a strategic fit with LionGold’s existing alluvial gold projects in Ghana.**
- **Signature’s shareholders will benefit from LionGold’s expertise and financial, development and operational skills. Liongold has expertise in both alluvial mining and underground mining.**
- **The Konongo project currently has a resource of 1.47Moz gold (JORC Indicated and inferred categories – refer Table 1) and a 350ktpa CIL plant.**
- **The transaction leverages synergy between LionGold’s commercial and technical management team and Signature’s management team.**
- **The acquisition is consistent with LionGold’s stated strategic intention to aggressively expand its assets in West Africa and South East Asia.**

Competent Persons Statement

The Mineral Resources presented in this table for the Obenemase, Boabedroo, Aserewa, Atunsu, Apan and Patuo Deposits, as well as for the Old Konongo Tailings Dam is based on information compiled by Mr Peter Ball who is a Member of the Australasian Institute of Mining and Metallurgy and is the Manager of Data Geo. Mr Ball has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Ball consents to the inclusion of this table in the report in the form and context in which it appears based on the information presented to him.

The Mineral Resources for the Obenemase, Boabedroo, Aserewa, Atunsu, Apan and Patuo Deposits were derived from solid models of mineralised zones defined by geology and Au grade. Au grade was estimated into block models created from these zones using Inverse Distance². Tonnage was assigned by weathering condition (oxide, transition, fresh) using default SG values generated from historical drill core measurements. The Mineral Resources are classified according to geological continuity, grade continuity and geostatistical parameters relating to sample density. The Mineral Resource is reported below the recorded extents of open cut mining at a 1.0g/t cutoff for fresh rock material and a 0.5g/t cutoff for oxide & transition material. Material recorded as being mined by underground methods has also been removed from the Mineral Resource. For tailings material all material is included in the Mineral Resource.

Other Mineral Resources presented in this table have been compiled and reviewed by Mr Bill Oliver from publically stated JORC-compliant information originally prepared in 2005 by RSG Global for Mwana Africa's AIM-listing document. This information, in the opinion of Mr Oliver, complies with the reporting standards of the 2004 JORC Code. Mr Oliver is a Member of the Australasian Institute of Mining and Metallurgy and the Australian Institute of Geoscientists and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Oliver is a Director of Signature Metals and consents to the inclusion of this table in the form and context in which it appears based on the information presented to him.

A party will be assumed to be entitled to a full Input Tax Credit unless it demonstrates that its entitlement is otherwise prior to the date on which payment must be made.
